

In this successful example, RAMVC trueUP exhausted a quick series of retroactive, real-time reconciliation and refund demands to [LG Funding LLC](#) regarding their MCA agreement within a four day period reconciling our merchants payments according to contract law. RAMVC trueUP analyzed the merchant's account historical payment records, identifying that over **\$4,371.00 was overpaid** due to contract non-compliance with real-time business receivable adjustments!

FINAL OUTCOME: This led to a prompt retroactive 'refund' and 'reduction' in illegal flat weekly MCA payment obligations from **\$2,600.00 down to \$797.44 estimated weekly going forward aligning future payments with a 9% revenue-based rate**. The entire reconciliation and refund process involved a 5 day turn-around which emphasized the enforcement of real-time reconciliation standards, reducing costs, and safeguarding against default risks in contracts.

Why Merchants Prefer RAMVC trueUP vs. Debt Relief Services/Reverse Consolidations?

- **Debt Relief Services (Caution)** 'DR services' often charge higher fees with minimal debt relief impact, leaving many businesses unreconciled and at risk of defaults.
- **Reverse Consolidation (Caution)** 'RC' bundles all MCAs into a single debt, adding another factor rate increasing costs without addressing fundamental compliance.
- **RAMVC trueUP (Preferred)** 'RAMVC' avoids temporary fixes demanding MCA companies immediately reconcile and refund flat overpayments based on real-time business receivables, helping to avoid defaults, additional debt, and challenging contract terms for potential 'usury-voiding'.

30.5% SAVINGS ON WEEKLY PAYMENTS! (-\$1,802.56 Discounted from flat payments)

*****RAMVC trueUP is the most *cost-effective* solution in the MCA sector eliminating defaults as they should not exist. **Read More:** [RAMVC|trueUP](#)
